Professional Summary

Full Stack Developer with 3 years of experience building scalable web applications using Angular, Java, and Spring Boot. Skilled in developing secure, efficient, and user-focused solutions for data-driven enterprise platforms.

Technical Skills

Backend: Java 11+, Spring Boot, Microservices, Node js, Rest API design
Cloud: AWS (Lambda, S3, ECS/EKS, DynamoDB - familiarity)
Frontend: Angular, TypeScript, JavaScript, Node js, Responsive UI design
DevOps: Docker, Kubernetes, Git, CI/CD pipelines (Jenkins/Github)
Database: PostgreSQL, SQL Server, MySQL
Security: OAuth2, OKTA, secure coding practices

Professional Experience

Company: Infosys 🗓️ **Mar 2023 – April 2024**
Client: Logistics Intelligence Platform **Systems Engineer**

- Developed backend services using **Java and Spring Boot** to manage real-time inventory tracking across multiple logistic hubs.
- Designed and implemented data models to maintain shipment status, inventory locations and operational workflow records efficiently.
- Participated in debugging and optimizing backend processes, improving reliability and reducing errors in data flow.
- Wrote comprehensive documentation in Confluence covering API endpoints , application flow diagrams to support cross-functional teams and new developers.
- Contributed to migrating the fronted application from Angular 6 to Angular 16, updating deprecated modules.
- Worked closely with cross-functional teams including QA engineers and product owners to ensure seamless integrations and timely delivery of features.

Company: Infosys 🗓️ **May 2024 – Present**
Client: Industrial Energy Insights Portal **Senior Systems Engineer**

- Integrated Google Maps API into the Angular dashboard to visually display turbine plant locations with real-time parameters such as speed, health status, last maintenance date.

- Implemented modules for **scheduled outage management**, allowing users to plan maintenance, view upcoming downtime, and update repair progress directly from the UI.
- Created backend logic in **Spring Boot** to generate exportable reports, supporting **PDF and Excel** formats for turbine performance, outages, and maintenance summaries.
- Optimized backend APIs by improving database queries, reducing unnecessary joins, and introducing pagination/caching to deliver faster and more responsive data to the frontend.
- Took end-to-end ownership of assigned features design, development, testing, and documentation, ensuring timely and high-quality deliveries.

Education

B.Tech in Mechanical Engineering
GITA Autonomous College, Bhubaneswar, Odisha | 2018 – 2022

Higher Secondary (Science)
P.N. College, Khordha, Odisha | 2016 – 2018

Secondary Education
Janta Bidyapitha, Podadiha, Odisha

Certifications

- Microsoft Certified: Azure Fundamentals
- Infosys Certified Angular Associate
- Infosys Certified Angular Architect
- Infosys Certified AWS Cloud Practitioner
- Infosys Certified Database & SQL Professional
